Breastfeeding IS A TEAM EFFORT

Breastfeeding benefits all of us—from babies and mothers to businesses. However, for a variety of reasons, many women stop breastfeeding earlier than recommended. We can support mothers by creating an environment that encourages and supports breastfeeding.

Many women don't breastfeed for the recommended time

Almost all Washington mothers started breastfeeding at birth. But 10 weeks later fewer than 8 in 10 mothers were still breastfeeding*... ...and that number declined further at 6 months*... ...and was even lower by 12 months.

Why is there such a drop in Breastfeeding rates?

Mothers are encouraged to breastfeed for at least one year, but many stop sooner for a variety of reasons, many of which are avoidable.

While mothers of all age-groups, income levels, race or ethnic groups experienced these barriers, those who were 20-34 years old, non-Hispanic white, Hispanic, or on Medicaid were more likely to report at least one of these reasons for stopping breastfeeding.

Employment related barriers:

My employer will not provide the flexibility so I am faced with staying home and not working to feed my baby. I still want, and NEED to work, but this situation causes more stress, so I produce less milk...

65% “I thought I wasn’t producing enough milk”

29% “My baby had difficulty latching on”

24% “I went back to work or school”

23% “It was too hard, painful, or time consuming”

16% “I thought my baby wasn’t gaining enough weight”

8% “I felt it was the right time to stop”

4% “My health care provider told me to stop”
Breastfeeding benefits all of us — babies, mothers, and communities

**Babies & Toddlers**
- Increases baby’s immunity against diseases
- Decreases risk of SIDS
- Decreases lifelong risk of obesity

**Breastfeeding Mothers**
- Protects mothers from breast and ovarian cancer and cardiovascular disease
- Decreases risk of postpartum hemorrhaging
- Cheaper than formula

**Communities & Businesses**
- Saves the U.S. $4.3 billion in health care and related costs each year
- Smaller environmental impact
- Reduces lost work days due to sick babies

---

**Healthcare System**
- Adopt breastfeeding policies
- Provide time and space to express milk
- Provide insurance covering lactation consultation and high-quality breast pumps

**Hospitals & Clinics**
- Adopt breastfeeding friendly maternity care practices
- Ensure all providers caring for women and children are trained in breastfeeding support

**Employers**
- Support local breastfeeding coalitions
- Adopt breastfeeding friendly ordinances
- Create breastfeeding friendly culture at local businesses

**State Government**
- Work to provide paid parental leave
- Support breastfeeding in all state agencies

---

*includes mothers who breastfed exclusively and those who supplemented breastfeeding with other nutrition
