

STATE OF WISCONSIN  
DEPARTMENT OF HEALTH SERVICES

## Title V MCH Block Grant Public Input

Page 1 of 4

### Introduction

As part of the annual Title V MCH Block Grant Application, Wisconsin is required to make the federal report and application available to facilitate comments from any person during its development and after its transmittal. This includes input received from key partners such as local public health departments, the MCH Advisory Committee and parents, especially parents of children and youth with special health care needs, as well as providing additional opportunities for the public to comment.

This survey tool has been developed to serve as a mechanism to elicit data, information, opinions and perspectives from consumers and partners across the state who are informed of and concerned about the needs of the Maternal & Child Health populations, the existing MCH services and resources that exists in the state and the existing political context and other environmental factors that will affect the implementation of policy and programmatic changes.

Thank you for taking the time to provide your valuable input into the MCH Block Grant.

### Major and Emerging Health Concerns and Unmet Needs

Wisconsin's Title V Maternal and Child Health (MCH) Program serves specific maternal and child populations. For each of the following populations or groups for which you have experience, what do you think are a) the major or emerging health concerns and b) the biggest needs that are not being met?

1. Reproductive Age Women

2. Pregnant Adolescents and Women

3. Newborns and Infants (Birth to Age 1)

4. Young Children (1 - 5 Years of Age)

5. School Age Children (6 - 12 Years of Age)

6. Youth and Adolescents (13 - 18 Years of Age)

7. Children with Special Health Care Needs (Birth to 12 Years of Age)

8. Youth with Special Health Care Needs (13 - 21 Years of Age)

### Service Delivery Systems for MCH Populations

Wisconsin is fortunate to have a myriad of programs and agencies across the state that are available to serve the maternal & child health populations.

9. Are there specific programs or aspects of the service system that **are working** particularly well?

10. Are there specific programs or aspects of the service system that **are not working** particularly well?

11. Are there particular populations in the state or specific regions of the state upon which the system needs to provide additional supports? If so, please indicate who or where and what types of supports are needed?

### Recommendations

After reviewing the information in the Title V MCH Block Grant, in particular the National and State Performance Measures, please consider the following questions...

12. What specific recommendations do you have for strengthening and improving the health of mothers and children in the state? (This may include a variety of recommendation such as but not limited to: recommendation to collect certain types of data to better understand an issue; reform or restructure an aspect of the service system; strengthen an existing policy that impacts the health of families; OR share information with stakeholders to provide education about a particular policy).

13. Other Comments

14. In case we would like to follow up on the information and comments you provided, please consider sharing your name and the best way to contact you (phone number or email address)...
