

Title V National Performance Measure Resource Sheet

NPM 12: Transition

Percent of children with and without special health care needs who received services necessary to make transitions to adult health care

SUMMARY OF STRATEGIES FROM STATE ACTION PLANS

37 jurisdictions selected NPM-12

Common themes → education & training, communication, leadership development

- Establish a baseline of Title V contracted providers (or medical home providers or specialty clinics or health plans) regarding their current level of transition implementation using the Six Core Elements' measurement tools
- Identify and implement strategies that expand the availability of adult providers accepting new young adult patients with special needs, including those with intellectual/developmental disabilities, complex medical conditions and mental health conditions
- Partner with state chapters of the American Academy of Family Physicians, the American College of Physicians and the American Association of Nurse Practitioners to promote the use of evidence-informed transition services
- Partner with state Title V grantees and American Academy of Pediatrics' chapters to promote the use of evidence-informed transition services
- Increase the number of transition quality improvement initiatives using the Six Core Elements with involvement from both pediatric and adult practices and parent and young adult consumer partners
- Increase the number of Title V recipients who report that they have been informed of Title V's transition policy; who have received a transition readiness assessment, a written plan of care that incorporates transition, a medical summary and emergency care plan; and who have received assistance identifying an adult provider

- Partner with state Medicaid agency to develop managed care contract requirements for health care transition and to secure payment for transition services
- Increase the availability of health care transition information and resources, including linking with national health care transition resources at Got Transition's website, www.GotTransition.org
- Integrate strategies linking transition to medical home, adolescent preventive care, well-care for women and adequate health insurance

BEST PRACTICES

Below are highlights of related cutting-edge, emerging, promising and best practices located in **Innovation Station**.
