Iowa
Maternal and Child Health Block Grant 2015

The Maternal and Child Health Services Block Grant, Title V of the Social Security Act, is the only federal program devoted to improving the health of all women, children and families. Title V provides funding to state maternal and child health (MCH) programs, which serve 42 million women and children in the U.S. To learn more about Title V, visit www.amchp.org.

Title V Administrative Agency:
Bureau of Family Health, Division of Health Promotion and Chronic Disease Prevention, Iowa Department of Public Health

*States must provide a three dollar match for every four Federal dollars allocated.

Protecting and Improving the Health of Iowa’s Families

Child and Adolescent Health — Twenty-two local child health agencies provide child health service to approximately 200,638 children, ages 0 to 22 years in all 99 counties. The child health agencies serve as the community utility to link families to medical and dental homes. Through care coordination services, the child health programs help families access physical examinations, vision and hearing screening, dental education and referral. They may also provide gap filling services, such as, immunizations, developmental, nutrition and psychosocial screenings, and laboratory tests including blood lead testing. The program is a collaborative effort between Iowa’s Medicaid agency and state and community Title V programs.

Maternal Health — Twenty-one local maternal health agencies provide maternal health services to approximately 9,426 low-income pregnant women. The maternal health agencies serve as the community utility to link pregnant women to prenatal care. A wide range of health education and support services are available to low-income pregnant women, such as risk assessment, psychosocial screening, oral health screening, delivery planning and presumptive eligibility. The maternal health agencies also provide care coordination to promote early entry into care.

Oral Health — The Title V oral health program coordinates the I-Smile™ dental home initiative, which develops partnerships, builds referral systems, promotes oral health, provides care coordination for families, provides preventive services, and educates the public about the importance of early and regular dental care. I-Smile™ also interfaces with medical providers, offering trainings on conducting oral screenings and applying fluoride varnish to children younger than age 3 and emphasizing referrals for dental visits by age one. In FFY13, over 46 percent of Medicaid eligible children in Iowa ages 0-5 years received a dental service. The oral health program also implements several school-based dental sealant programs, targeting schools with low-income, uninsured, and underinsured children.

Children and Youth with Special Health Care Needs — Administered by Child Health Specialty Clinics (CHSC) in the University of Iowa Stead Department of Pediatrics, this program serves children and youth with special health care needs (CYSHCN), including those with or at risk for chronic illness, behavioral/emotional problems or developmental delay. The CHSC vision is to assure a system of care for Iowa’s CYSHCN, and includes the following four components: 1) clinical services to children and youth when services are not already available in the community; 2) care coordination; 3) family-to-family support; and 4) infrastructure/systems-building to improve the health care system. CHSC partners with families of CYSHCN at all levels of decision-making. An extensive community-based Family Navigator Network provides problem-solving and emotional support to families of CYSHCN.

There are 14 community-based regional centers, four satellite centers, and one central office site. Regional Centers provide family-to-family support, care coordination, and gap-filling clinical services. Telehealth is utilized to increase access to specialty services for families.
People Served by the Iowa MCH Program*

Title V population-based preventive and systems building services benefit all women and children in the state. In addition, the MCH Block Grant provided direct services to the following individuals:

- 9,426 pregnant women
- 38,166 infants under one
- 162,472 children and adolescents
- 6,134 children with special health care needs
- 0 others
- 216,198 total served

*2013 State/Jurisdiction Annual Reports Submitted to the Maternal and Child Health Bureau

Health Needs in Iowa

- High proportion of children age 14 years and under experiencing unintentional injuries
- Lack of providers to do restorative dental treatment for children age 5 years and younger
- Lack of a coordinated statewide system of care for CYSHCN.
- CYSHCN and families lack access to resources to assist with transitions to adulthood
- Limited access to a medical/health home approach to care for children
- Barriers to access to health care, mental health care, and dental care of or low-income pregnant women
- Lack of access to preventive and restorative dental care for low income pregnant women
- Lack of coordinated systems of care for preconception and interconception care for high-risk and low income women
- Racial disparities in maternal and child health outcomes
- Lack of adoption of quality improvement methods within maternal and child health practice
