Michigan
Maternal and Child Health Block Grant 2015

The Maternal and Child Health Services Block Grant, Title V of the Social Security Act, is the only federal program devoted to improving the health of all women, children and families. Title V provides funding to state maternal and child health (MCH) programs, which serve 42 million women and children in the U.S. To learn more about Title V, visit www.amchp.org.

Title V Administrative Agency:
Bureau of Family, Maternal and Child Health
Department of Community Health

*States must provide a three dollar match for every four Federal dollars allocated.

Protecting and Improving the Health of Michigan’s Families

Children with Special Health Care Needs — Medical care includes a wide range of services such as physician care, multidisciplinary specialty clinic care, hospitalization, pharmaceuticals, special therapies and durable medical equipment, home health nursing, and orthotics and prosthetics. Services are provided through an approved list of providers including physicians, clinics, hospitals, home health agencies, and qualified health plans (managed care). Additionally, local health departments provide community-based support through case management and care coordination services.

Hearing and Vision Screening — This program screens preschool and school-age children for hearing and vision problems. Local agencies are trained to conduct the testing and provide referral, follow-up and community education.

Newborn Screening — All newborns are screened for 51 disorders. Components of the program include regional coordination and training in all maternity hospitals, centralized laboratory testing and follow-up, and contracted medical management. The MCH program contracts with four medical centers to assure or provide comprehensive diagnostic and treatment services.

Safe Sleep — Safe Sleep services include a statewide, consistent, comprehensive message and strategy to inform families and caregivers about sleep practices to prevent infant sleep-related deaths.

Adolescent Health — Designed for school-aged children and youth 5 through 21 years of age aimed at achieving the best possible physical, intellectual and emotional status. These clinical and non-clinical centers provide comprehensive primary care, health education, peer counseling, screening/case finding services, referral for specialty care, Medicaid outreach services and/or health-related community awareness activities.

Fetal-Infant Mortality Review — Multidisciplinary teams review cases of fetal and infant death to identify factors and implement improvements in systems of maternal and infant care. Provides technical assistance and training to local teams. Complements other studies of infant death but uses a community-based approach designed to bring together local health providers, consumers, advocates and leaders.

People Served by the Michigan MCH Program*

Title V population-based preventive and systems building services benefit all women and children in the state. In addition, the MCH Block Grant provided direct services to the following individuals:

- 88,176 pregnant women
- 112,503 infants under one
- 2,558,452 children and adolescents
- 40,786 children with special health care needs
- 1,354,991 others
- 4,154,908 total served

*2013 State/Jurisdiction Annual Reports Submitted to the Maternal and Child Health Bureau
Health Needs in Michigan

- Reduce African American and American Indian infant mortality rates.
- Address environmental issues (asthma, lead and second-hand smoke) affecting children, youth and pregnant women.
- Increase access to early intervention services and developmental screening within the context of a medical home for children.
- Reduce obesity in children and women of childbearing age, including children with special health care needs.
- Increase the proportion of CSHCN population that has access to a medical home and integrated care planning.
- Increase access to dental care for pregnant women and children, including children with special health care needs.
- Decrease the rate of sexually transmitted diseases among youth 15-24 years of age.
- Reduce discrimination in health care services in publicly-funded programs.
- Reduce intimate partner and sexual violence.
- Increase the proportion of intended pregnancies.
