Michigan

Maternal and Child Health Block Grant 2020

The Maternal and Child Health Services Block Grant, Title V of the Social Security Act, is the only federal program devoted to improving the health of all women, children, and families. In FY2018, 91% of all pregnant women, 98.7% of infants, and 53.7% of children nationwide benefitted from a Title V-supported service. To learn more about Title V, visit www.amchp.org.

Title V Administrative Agency:
Division of Maternal and Infant Health
Department of Health and Human Services

*States must provide a three dollar match for every four Federal dollars allocated.

Protecting and Improving the Health of Michigan’s Families

Children with Special Health Care Needs — The medical care and treatment program includes a range of services such as physician care, multidisciplinary specialty clinic care, hospitalization, pharmaceuticals, special therapies and durable medical equipment, home health nursing, and orthotics and prosthetics. Services are provided through approved providers including physicians, clinics, hospitals, home health agencies, and qualified health plans (managed care). Local health departments also provide community-based support through case management and care coordination services. A parent-directed Family Center provides family engagement, support, and consultation to MCH programs.

Perinatal Care — Michigan is supporting and expanding Regional Perinatal Quality Collaboratives (RPQCs) to improve birth outcomes and assure the most vulnerable infants and mothers receive appropriate care and services. The RPQCs are key drivers of the Mother Infant Health & Equity Improvement Plan, which aims to achieve zero preventable deaths and zero health disparities.

Immunization — Title V is focused on increasing the percent of children 19-36 months of age who receive a completed series of recommended vaccines as well as adolescents 13-18 years of age who receive a completed HPV vaccine series. Strategies to boost immunization rates include implementing the I Vaccinate campaign and working with providers and local health departments to implement quality improvement efforts.

Lead Poisoning Prevention — Michigan is working to increase the percent of children under six who receive a venous lead confirmation test (focusing on those enrolled in Medicaid Health Plans) and to enhance analysis of surveillance data, while also leading nurse case management and home abatement efforts.

Safe Sleep — According to the Sudden Unexpected Infant Death Case Registry Project, three out of four sleep-related infant deaths in Michigan occurred in an unsafe sleep location. Strategies to impact safe sleep include building capacity among local health departments and non-traditional partners; developing public messaging that is culturally appropriate and relevant to families; and helping providers have effective conversations with families about safe sleep.

Oral Health — The Oral Health Program provides population-based prevention activities and collaborates with community partners to increase access to oral health programs and services. Title V activities focus on increasing the number of students who receive a preventive dental screening through a school-based dental sealant program.

Other MCH Priorities — Title V supports activities related to reproductive health, infant mortality reduction, breastfeeding, adolescent well-visit, maternal mortality surveillance, and health equity. At the local level, Title V supports the MCH work of all 45 local health departments in the state.
Health Needs in Michigan

- Reduce barriers, improve access, and increase the availability of health services for all populations
- Support coordination and linkage across the perinatal to pediatric continuum of care
- Invest in prevention and early intervention strategies
- Increase family and provider support and education for Children with Special Health Care Needs
- Increase access to and utilization of evidence-based oral health practices and services
- Foster safer homes, schools, and environments with a focus on prevention
- Promote social and emotional well-being through the provision of behavioral health services

State Selected National Performance Measures

- Well-Woman Visit
- Risk-Appropriate Perinatal Care
- Breastfeeding
- Safe Sleep
- Adolescent Well-Visit
- Transition
- Preventive Dental Visit
