New York

Maternal and Child Health Block Grant 2020

The Maternal and Child Health Services Block Grant, Title V of the Social Security Act, is the only federal program devoted to improving the health of all women, children and families. In FY2018, 91% of all pregnant women, 98.7% of infants, and 53.7% of children nationwide benefitted from a Title V-supported service. To learn more about Title V, visit www.amchp.org.

Title V Administrative Agency:
Division of Family Health, New York State Department of Health

*States must provide a three dollar match for every four Federal dollars allocated.

Protecting and Improving the Health of New York’s Families

Maternal and Infant Health
Improving the health of NY’s families continues to be paramount. NY is a national leader in the development of a statewide system of perinatal regionalization to ensure appropriate obstetrical and neonatal care is provided. Efforts include working with stakeholders to update the perinatal regulations to ensure both obstetrical and neonatal care are available and include birthing centers as a part of the regional perinatal system. NY also has robust insurance options for families, including Medicaid eligibility up to 223% of the FPL for pregnant persons, an Essential Plan option and a strong Marketplace The New York State Department of Health (NYSDOH), Division of Family Health is the State lead for the Maternal, Infant and Early Childhood Home Visitation (MIECHV) program and uses funding to support evidence-based home visiting services, Nurse Family Partnership and Healthy Families. Leveraging both Title V and MIECHV, NY continues to support services for pregnant and parenting people and their families to promote and facilitate healthy behaviors across the lifespan.

Under Title V and as part State priority efforts there are multiple initiatives underway to reduce maternal mortality and racial disparate outcomes. This includes a state-level maternal mortality review board to review each maternal death and make recommendations to reduce maternal mortality. In addition, the New York State Perinatal Quality Collaborative (NYSPQC), which engages partners and birthing hospitals across NYS is currently focused on reducing maternal mortality and morbidity by improving assessment, identification and management of obstetric hemorrhage; identifying and managing care of women with opioid use disorder during pregnancy and improving therapy and coordination of care of infants with neonatal abstinence syndrome; improving safe sleep practices; and optimizing early enteral nutrition for newborns <31 weeks gestation in NYS NICUs.

Children and Adolescents
NY’s commitment to ensuring all children and adolescents have access to health care services is longstanding. NY subsidizes Medicaid coverage for children in families with incomes up to 400 percent of the FPL. NY continues to operate one of the largest School-Based Health Center (SBHC) Program in the nation with 49 hospitals and health centers sponsoring 267 clinics within schools across the state. NY is committed to ensuring oral health is an integral part of health care, including serving children in SBHC programs. NY’s comprehensive adolescent pregnancy prevention initiative focuses on implementation of evidence-based sexual health education and reducing racial and ethnic disparities. NY has a rich history of providing reproductive health services to NY’s most vulnerable population through 48 Family Planning agencies operating 165 clinics that provide free or low-cost FP and reproductive health care services to nearly 60,000 teens.

Children and Youth with Special Health Care Needs
A priority of NY is to advance supports and services to support families with children and youth with special health care needs. This includes expansion of Medicaid Managed Care to additional MA-eligible populations (including children and youth in foster care); expanding the state’s Patient-Centered Medical Home Program; and implementing Health Home (enhanced care coordination services) for high-need MA enrollees, including tailoring Health Homes for children. NY’s Early Intervention Program provides services to almost 70,000 infants and toddlers with disabilities and their families. The CYSHCN program provides grant funds to local health departments (LHDS) to provide information and referrals for services and supports, including accessing health insurance. The Children and Youth with Special Health Care Needs Support Services, which is administered by the LHDS, provides gap-filling coverage for services rendered to CYSHCN who are uninsured or underinsured.
Health Needs in New York

- Reduce racial, ethnic, economic and geographic disparities and promote health equity for MCH populations (cross-cutting).
- Reduce maternal mortality and morbidity.
- Reduce infant mortality and morbidity.
- Support and enhance social-emotional development and relationships for children and adolescents.
- Increase supports to address the special health care needs of children and youth.
- Increase the use of preventive health care services across the life course.
- Promote oral health and reduce tooth decay across the life course.
- Promote home and community environments that support health, safety, physical activity, and healthy food choices across the life course.
