

Wisconsin: M-Team (Multifaceted, Multidisciplinary, Milwaukee-Madison)

What's **one interesting thing** about your state?

- Have had money for relatively comprehensive ASD treatment for years
- More focus on supporting families in community/inclusion
- Focus on all DD, not ASD in a silo
- Many family navigation supports
→ navigate the navigator

Describe your team's **biggest challenge** around Family Navigation.

- In the middle of a lot of transition in system
- Because we have a lot, it is difficult to navigate, complex-need pathways
- Some families (urban, rural, low SES, etc.) have trouble accessing/navigating what is available
- Diagnostic bottlenecks

Describe **ONE current strategy** that your team is using around Family Navigation.

- Starting urban Family Navigation with a family member who is within the community

What is your team's **biggest strength** around Family Navigation?

- Commitment to evidence based (draw on current evidence, produce new evidence)
- Commitment to not duplicating (build on what exists and what is working)

What does your team **hope to gain** from this meeting?

- What does successful family navigation look like for urban core and rural?
